Aaron,

I am writing to let you know how delighted I am with my anchor. I have now used it for approx 17 months. The finish is as it was when fitted to the boat, still holding its high polish.

I have cruised the Sandy Straights and sat out some pretty strong blows, one reaching 80 knots. The boat has also been to Musgrave, Fitzroy Lagoons and the Swains Reef, the anchor has performed very well.

I was somewhat sceptical as to how it would go if jammed in rock. I have been up and down the coast and reef for about 30 years now and have been in some pretty large blows (and have had anchors jammed in rock). I am pleased to inform on one occasion we had to jerk hard and wrench the anchor out from the bottom. It arrived on deck with scratches on the outer edges but otherwise straight. And as new other anchors (i.e. mild steel shafts) have bent in these situations in the past, the extra cost has been worthwhile with no unsightly rust stains on the boat.

Overall this is a very good product. I am pleased I purchased this product, good luck with it in the future.

Cyril Thomasson
